DETAILED ACTION

The certified copy of the foreign priority application submitted on 09/26/2008 has been considered. Claims 20-23 and 27-29 have been canceled by the amendment on 09/26/2008. Claim 1 has been amended. Claims 1-19, 24-26 and 30 are pending. Claims 24-26 remain withdrawn as non-elected subject matter. Therefore, claims 1-19 and 30 are under examination on the merits.

Response to Amendment

The amendment by Applicants' representative Douglas P. Mueller dated on 09/26/2008 has been entered.

Response to Arguments/Remarks

Rejection under 35 U.S.C. §112, 2nd paragraph

Applicants have canceled the rejected claim 23. Therefore, the rejection is moot.

Rejection under 35 U.S.C. §102(e)/103a

Applicant's submission of the certified copy of the foreign priority application of Japan 2003-420031 has antedated the cited prior art. The rejections under 35 U.S.C. §102/103 have been withdrawn accordingly.

Claim Objections

Since the amendment has overcome the cited art rejection, search and examination have been expanded to previously non-elected subject matter. Therefore, the objection is moot. A new prior art has been found, which anticipates the expanded scope of subject matter as disclosed follow:

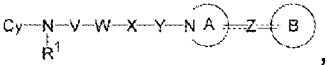

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15, 17, 19 and 30 are rejected under 35 U.S.C. 102 (e) as being anticipated by Dolle et al., *US2005-01007355 (now U.S. Patent No. 7,160,902)*.

Applicants' claims relate to a compound of the formula (I) , according to claim 1, a prodrug, or a pharmaceutical composition composing a compound thereof.

Dolle et al. disclosed a compound  (CAS RN 851680-59-6) as Compound 36 at line 30, Column 40 for a pharmaceutical application. This compound anticipates the instant claims 1-15, 17, 19 and 30.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 1626

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, the amended claim 1 excludes two species

these two compounds are not described in the original Specification. The closest

compound disclosed in the instant Specification is

which is patentably distinct from the instantly excluded compounds at the different substituent of **X**, wherein **X** is t-butyl substituted alkylene vs. 2-bromo- or 2-methoxy-phenyl substituted alkylene. The two excluded compounds are not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Also see MPEP§2173.05(i) under negative limitation. To overcome the rejection, applicants need to show the support in the original disclosure for such amendment.

Claim Objection

Claims 2-17, 19 and 30 are objected to for depending on rejected claim 1.

Conclusions

- Claim 18 is allowed.
- Claims 2-17, 19 and 30 are objected to.
- Claims 1-15, 17, 19 and 30 are rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
